1. Decorations

1.1. Magic Vibe Decorations

Legendary Crystals

End, Nether and Overworld dimensions inspired crystals, each with special ability with protective properties:

Ender Amethyst Crystal will protect area from endermen and phantoms getting near its location.

Nether Fire Crystal will start burning any fire sensitive entity within its range (zombies, skeletons) doesn't apply for wither mobs and zombified piglins.

Overworld Secrets crystal is deadly for any incoming creepers.

*Tip: place more crystals around your desired location to increase the potential of defensive effect.

1.16.5 Minecraft version doesn't contain amethyst → ender pearl instead as well as quartz and a dye for ametrine

Crystals

From 1.21.4+ version you can use shears to get more crystal shapes if you use them on any placed crystal (besides large clusters and the new shapes). Shapes provided from the legendary crystals grant the same protective abilities. Every crystal is convertible into crystal shards, key ingredient for various decorations.

Decorations

*use corresponding type of planks to get your desired bookshelf type

* any potion and flower can be used in required recipes

Crystal clusters and balls can be crafted from any shards

2023 LillouArts

Fairy lights

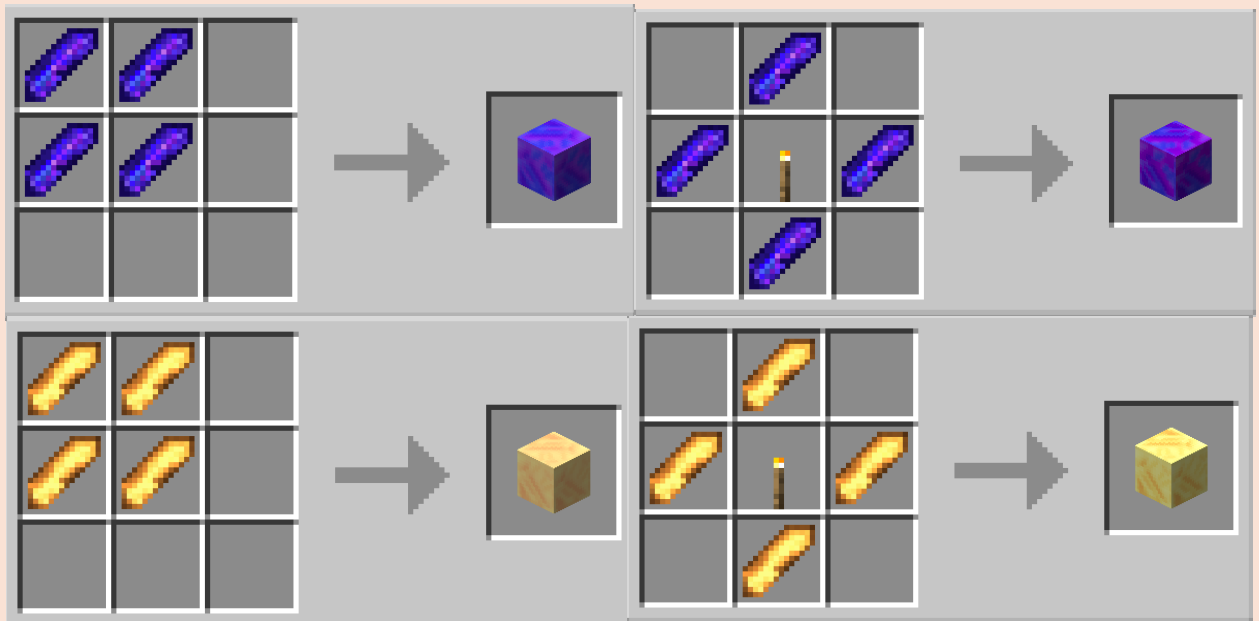

Available in multiple colors(blue, green, purple, pink, red, yellow) according to which shards you use

Miscellaneous

*Jewellery chest
can be crafted
from any crystals
and shards

Food

Sweet Pastries & decorations

2.2. Christmas Culinary Desires

Christmas tree, presents & decorations

Christmas trees are divided into three parts with multiple colors, according to color dyes in it's recipe, this gives more flexibility in building your dream colored and sized Christmas tree.

Place your specific color dye into present's recipe to get your desired color, each present contains customised interior in corresponding color!

Small presents have one slot, large presents can store up to five items in total.

Christmas tree stand to decently hold up your christmas tree above presents
Spruce logs in the recipe

Christmas Stocking available in multiple colors according to wool you use in the recipe

This Advent Wreath is specifically designed for candles placement

You can decorate classic spruce tree or your house with these fairylights!

2.3. Travel Friendly Food

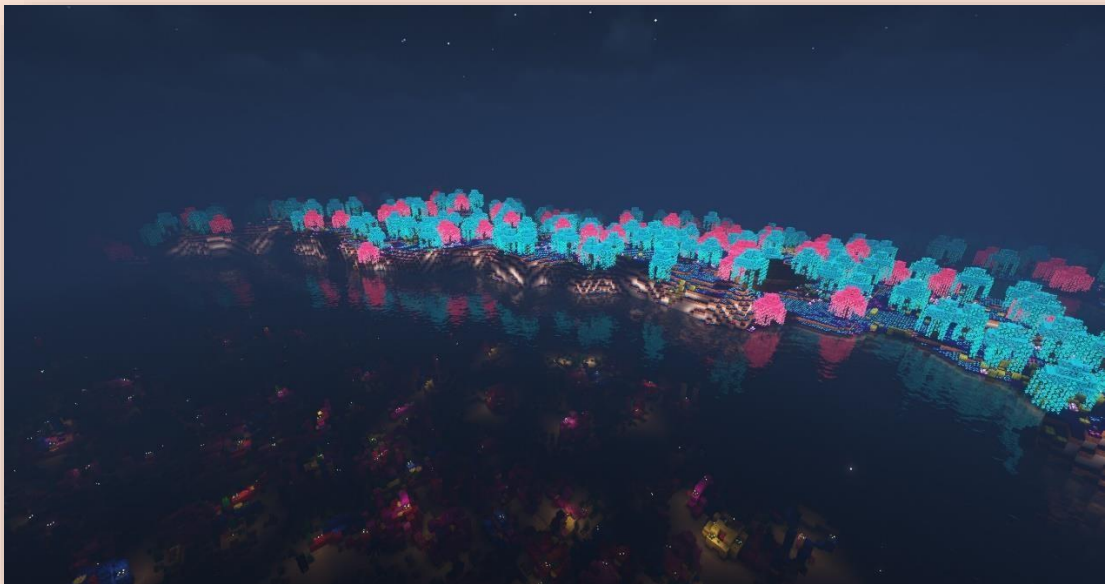

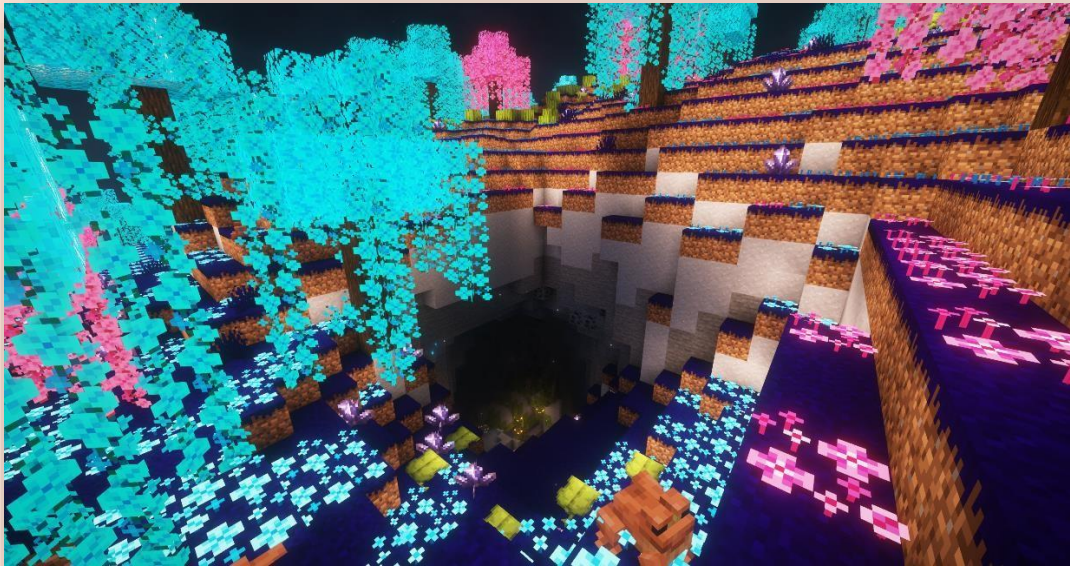

3. Biomes & worldgen mods

3.1. Decent Biomes

Moon Valley

Moon Valley is a biome enriched with luminiscent flora and especially enchanting at midnight hours. It most commonly spawns around badlands and warm oceans and is very resourceful in gold, amethyst and emerald ores. Often there are deep dripstone or other rich caves underneath the biome. Mobs that spawn in this biome are frogs, pigs, chickens, and rarely friendly allays to keep you company.

Autumnal forests

Mild climate forests with estetic autumnal copperty and golden tones. They are homes to foxes which can often be found snoring under the trees. In these biomes can be found pumpkins and regular minecraft mobs for farming possibilities.

Enhanced Cherry Grove

Enhanced Cherry Grove is a sister to original Minecraft's cherry grove added in 1.20 Trails and Tales update. It was created specifically with backport versions of Minecraft in mind and contains most of the thematic building blocks. The biome spawns commonly near swamps and is rich with cherry petals plants, as well as vines on the cherry trees. Enhanced cherry leaves drop cherries, which can be eaten or used to craft delicious pastries, as well as newly added harvestable cherry sapling for practical fruit farmers.

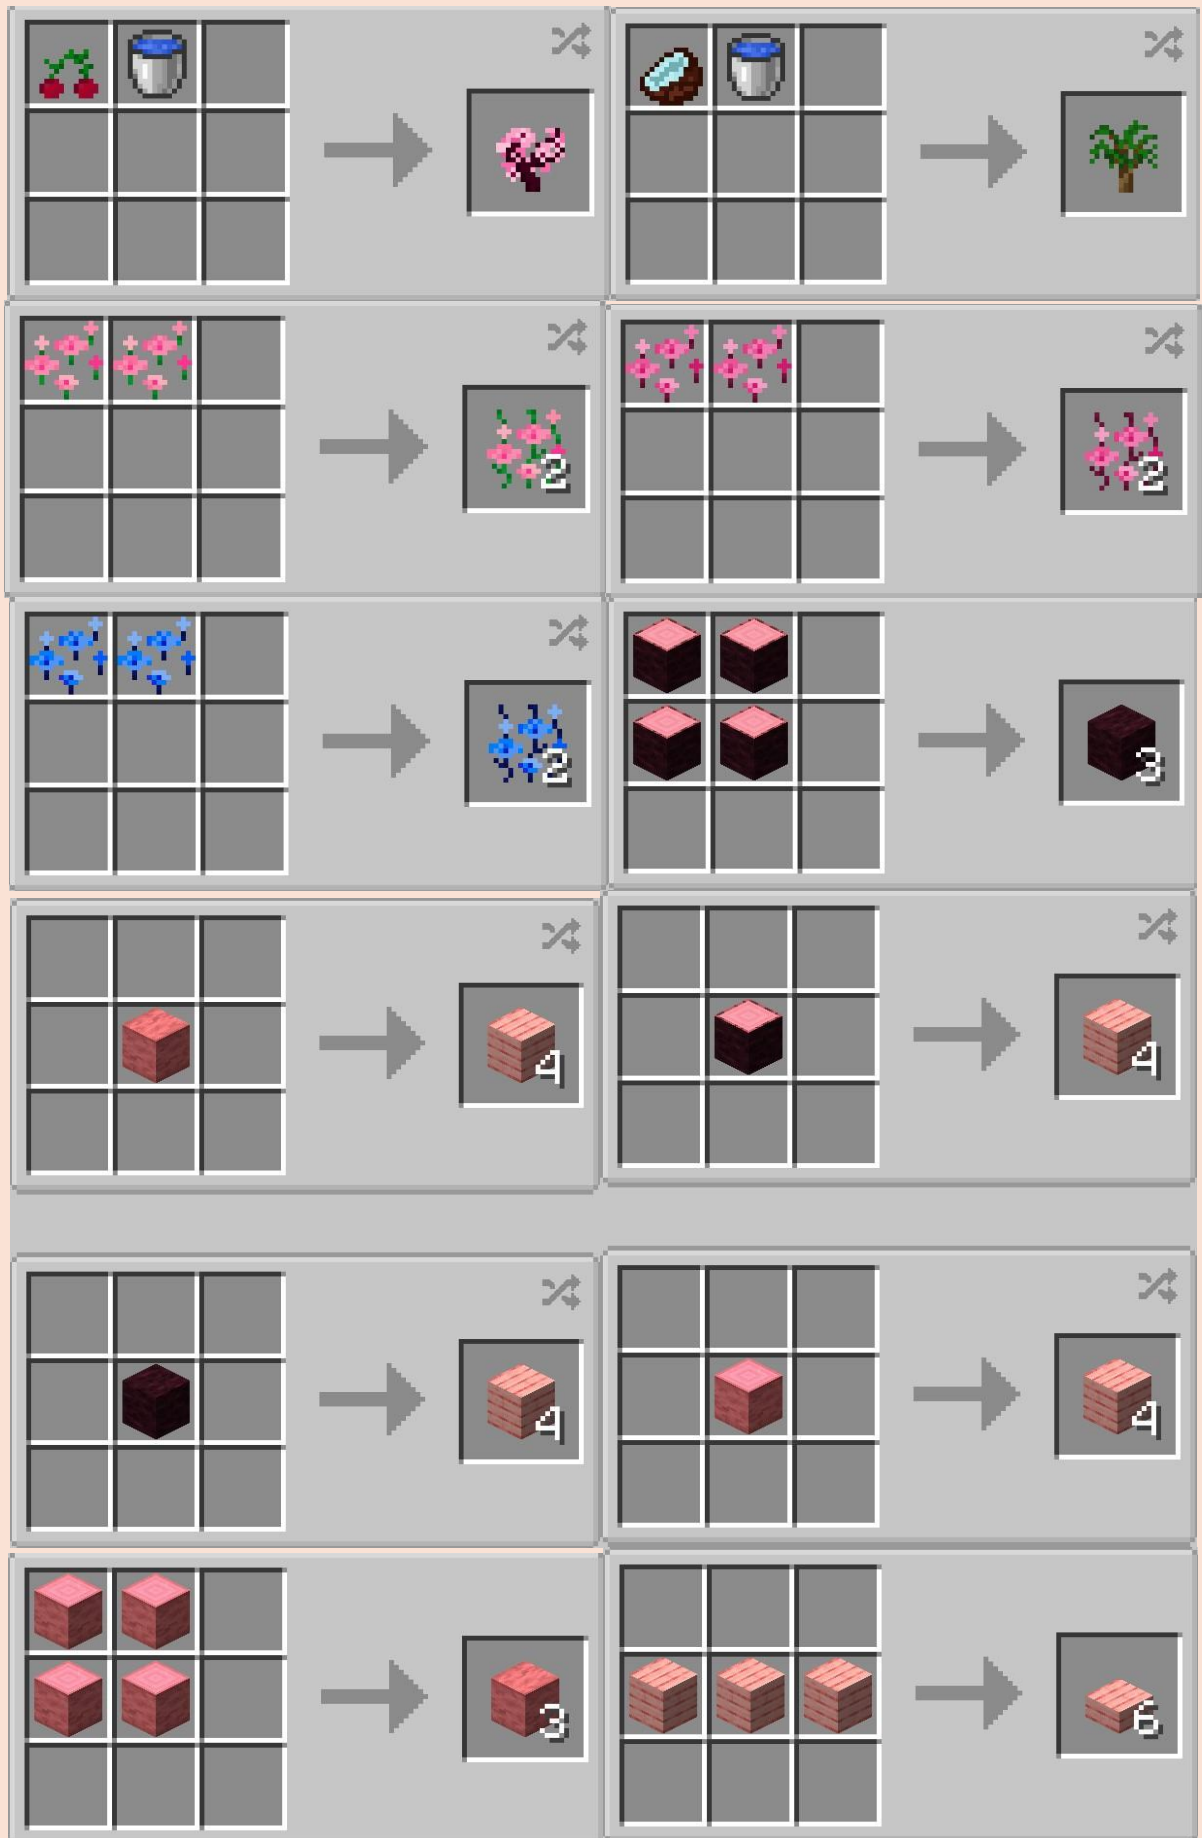

Floral & Golden Fields

Plains like biomes with vanilla flowers dressed in [Ensis better flowers](#) and [Kubban's tall flowers](#) resourcepacks, which are gorgeous and I absolutely recommend them for better minecraft experience.

Recipes

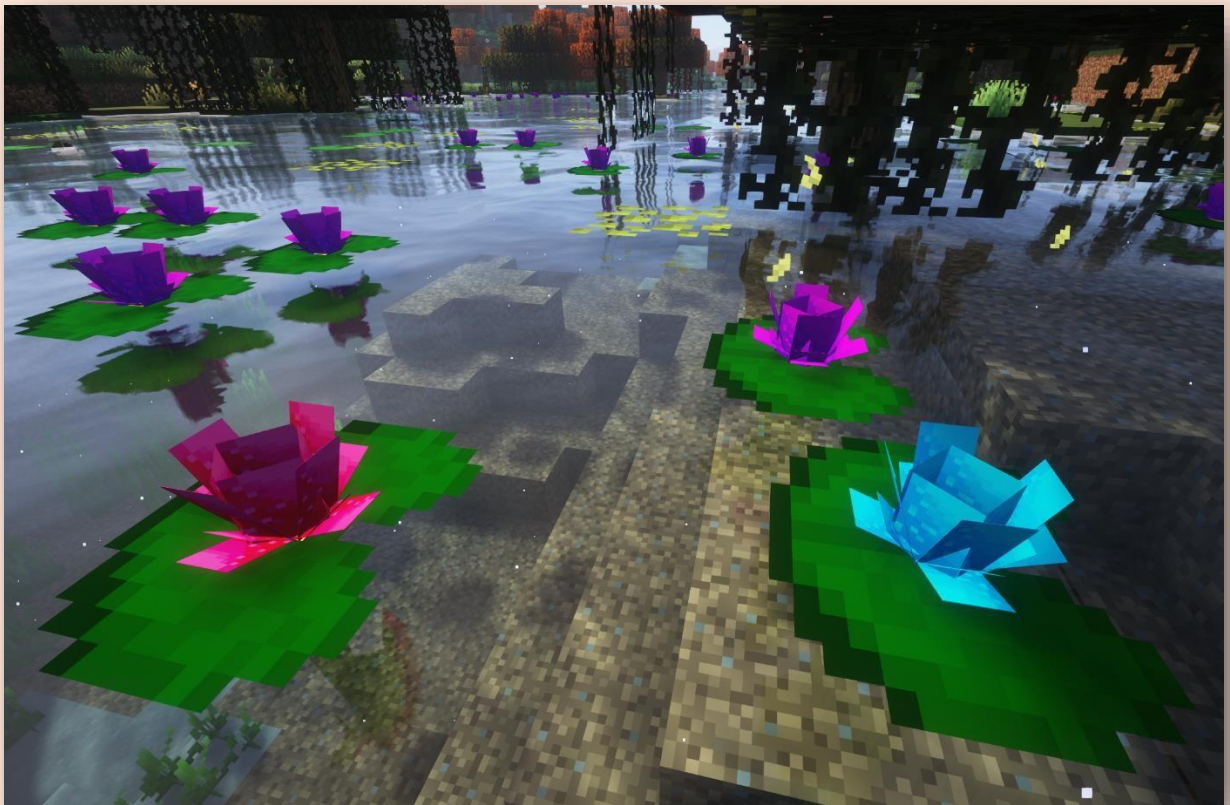

3.2. Valentine's Blessing

All Lilypads are very fragile plants, ensure there's no seagrass or kelp underneath them when placing, or they will break. Light colored lilypads can be found in rivers and vivid lilypads enhance swampy waters.

Rose Decorations

4. Performance & Gaming tips

Minecraft Shaders:

[Sildur's Vibrant Shaders](#) (tip: great for beautiful light shafts and colorful rays through glass), [EminGTR's Complementary Shaders](#) (tip: turn on setting "force glowing particles" and it will effect BetterEnd mod in such a beautiful atmospheric way as shown in the picture below.

*note: makes underwater bubbles sparkle and falling leaves from trees glow as well *Shaders do have strong impact on overall gaming performance, you can lower or switch off shadows to lower this impact, from experience it's preferred to use [Iris shaders](#) or reforked [Oculus \(for forge\)](#), instead of Optifine, as Optifine tends to cause most of crashes and fps drops.

Recommended resourcepacks:

[Resourcepacks by Ensis](#) especially flowers, vines and crops. Another flower resourcepack worth of admiration is [Kubban's tall flowers](#). If you like strawberries you might also like this resourcepack [Sweet berries to 3d strawberries](#).

These resourcepacks are commonly in older versions, but they do work in newest minecraft updates as well.
